For Immediate Release

## **Attend Deck & Railing University to learn how to build safe decks**

The Vinyl Fence, Deck and Railing Manufacturers Association, a Division of the American Fence Association, encourages companies in the deck and railing business and those considering entering it to send representatives to Deck and Railing University. Deck & Railing University will focus on building safe decks and heeding the relevant standards and codes. This 1.5 day deck and railing installation school will be held in Tulsa, Oklahoma, March 10-11. It is being co-sponsored by Tulsa Technology Center.

Deck & Railing University will offer classroom standards-based instruction on code requirements and safe deck and railing construction. It will also offer a hands-on installation lab addressing sub-structure construction, ledger board attachment, and proper installation of the range of popular decking and railing materials.

VFDRMA is tapping the experts on standards, codes and best practices to develop and conduct Deck & Railing University. In addition, school quality is being assured through the work of Dynamic Performance Solutions, a training consulting firm which is creating a formal training curriculum for the school.

The registration fee before February 18 for members of both AFA and VFDRMA is \$995, for members of AFA only is \$1,095 and for non-members is \$1,195. On or after February 18, the late registration fee for any registrant is \$1,195. To encourage early registration, the first ten registrants will receive a rebate so that their fee will only be \$895. The cost of registration

includes 1.5 days of intensive training, classroom instruction, hands-on installation lab, and expert instructors. This fee does not include hotel, meals or airfare.

To reserve a spot at the school, please contact Sara Wilson, [saraw@cmservices.com](mailto:saraw@cmservices.com), phone 800-822-4342.
